

Here is the message about the Bloat survey I would like to reach as many delegates, breeders and parent clubs as possible. This is important research and we need participation from all the breeds.

The literature on Bloat points in many directions which has not brought breeders any closer to a solution. For these reasons we have developed a new survey that focuses on some of the factors that might contribute to its occurrence.

We need breeders: That had a dog that bloated and/or a dog that did not bloat. This survey is the joint effort of Dr. Carmen Battaglia PHd of the AKC and Dr. Cindy Otto DVM, Univ. Penn, Vet School.

Our goal is to look at conditions that are relevant to the further study of this disease. Your contribution is appreciated. A summary of the results and findings will be posted on our website www.breedingbetterdogs.com in November 2010.

Click here to complete the survey:
<http://www.surveymonkey.com/s/WS2VKFP>

Thanks for any help that you can give to this effort

Carmen Battaglia
